

ONE VISIT DENTISTRY

Esthetic ceramic crowns or partial crowns
in a single visit. **Ask me about CEREC.**

We are not fooling ourselves, of course there are better things than having a new crown inserted. But we can do something to make it as quick and pleasant as possible. Are you interested?

**Then ask me about CEREC
by Dentsply Sirona.**

A DENTAL PROSTHESIS IN JUST A SINGLE VISIT

1

After the consultation, a camera captures the area to be treated.

3

The restoration created on the computer is subsequently milled from a ceramic block.

2

The dental prosthesis is then created as a 3D model on the computer.

4

The finished ceramic restoration is inserted just a little while later.

ADVANTAGES WITH CEREC

No unpleasant impression material

Say goodbye to biting on impression material for several minutes, having a numb mouth and jaw ache. Your dentist now has a camera that can capture your full dentition in seconds and then transfer this to the computer.

No bothersome temporary prosthesis

Temporary prostheses are exactly what the name suggests: temporary. With CEREC the final prosthesis is inserted directly without any temporary compromises needed.

No follow-up appointment

CEREC enables your dentist to insert esthetic ceramic crowns or partial crowns in a single session.

Long-term stability

More than just a theory: With CEREC you can rely on quality that has been proven millions of times over in the practice. Furthermore, thanks to your new dental prosthesis made by CEREC, your smile will be just as lovely many years later as it is directly after receiving the prosthesis.

A DENTAL PROSTHESIS IN A SINGLE VISIT
